

FAZIL KHAN

Software Developer | Full-Stack Application Development | Java, Python & JavaScript | Data Structures & Algorithms

Bengaluru, India | +91-7676694554 | fazilkhan624221@gmail.com | github.com/fazilkhan2106 | linkedin.com/in/fazilkhan21

PROFESSIONAL SUMMARY

MCA graduate with a strong foundation in Java, Python, and JavaScript, backed by solid Data Structures & Algorithms and Object-Oriented Programming fundamentals. Experienced in building full-stack and mobile applications with REST APIs, MySQL, and MongoDB, integrating multiple third-party services into production-style workflows. Solved 58+ DSA problems on LeetCode and holds a 4-star Java rating on HackerRank, a versatile developer eager to build reliable, user-focused software end to end.

TECHNICAL SKILLS

Languages: Java, Python, C

Frontend & Mobile: HTML, CSS, JavaScript, React Native

Backend & Databases: REST APIs, MySQL, MongoDB, API Integration, Modular Application Design

Core CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming (OOP), Operating Systems, Computer Networks, DBMS, System Design Basics

Tools & Practices: Git, GitHub, Linux, VS Code, Postman, Debugging, Code Optimization, Performance Tuning, Version Control, Automation

PROJECT EXPERIENCE

Wander Genie — AI Travel Planner

TypeScript, JavaScript, Google APIs, React Native, MongoDB | Jul 2025 – Dec 2025 | github.com/fazilkhan2106/WANDERGENIE

- Designed and built a full-stack mobile application that generates personalized travel itineraries using Google APIs, cutting user trip-planning time by 60%.
- Engineered core application logic and data-processing pipelines in TypeScript/JavaScript to handle dynamic user inputs and preferences.
- Integrated multiple third-party APIs to automate itinerary generation and enhance app functionality.
- Applied modular design principles and MongoDB data modeling to ensure the application remained scalable and maintainable.

AI Web Scraper

Python, Automation, Data Processing | Jan 2025 – Mar 2025 | github.com/fazilkhan2106/AI-WebScraper

- Built an automated Python system to extract and process large-scale web data, cutting manual data-collection effort by 70%.
- Designed reusable, scalable data pipelines that structured extracted data into JSON/CSV for downstream analysis.
- Improved execution efficiency and system reliability through iterative testing and optimization of scraping logic.

Core Software Development Projects

Java, Python, MySQL | Jan 2025 – Present |

- Built multiple standalone applications applying core software engineering principles, including algorithm design and structured program architecture.
- Implemented and optimized algorithms to improve runtime performance and memory efficiency.
- Practiced clean coding, debugging, and modular development while solving real-world problem scenarios with MySQL-backed data storage.

ACHIEVEMENTS

- Solved 80+ Data Structures & Algorithms problems on LeetCode — leetcode.com/u/fazilkhan21
- Achieved a 4-star rating in Java on HackerRank — hackerrank.com/profile/fazilkhan6242
- Active GitHub contributor with multiple original software projects.

CERTIFICATIONS

- Python Programming Certification — 2024
- AI, NLP, RPA & Generative AI Program — 2024

EDUCATION

Master of Computer Applications (MCA) — East Point College of Higher Education, Bengaluru

CGPA: 8.4 / 10 | 2025
